# KNOW-HOW

## “FROM STRUCTURE MANUFACTURE TO TIMBER GENERAL CONTRACTOR”

**Over more than 200 years**, MATHIS has developed its know-how around the use of timber in construction.

Its expertise covers glued laminated timber (glulam) structures and construction systems for walls, floors and roofs.

Through the evolution of regulations, economic constraints and deadlines, MATHIS has been carrying out public and private projects as a general contractor for 40 years.

Our project management engineers are with you every step of the way from the development to the construction of your projects.

*Curve building in Saint Denis (93) - 20,600 m<sup>2</sup>*

Customer: BNP Paribas Immobilier

Architect: Chartier Dalix

Architect: Octant Architecture

TGV station in Lorient (56)

Architect: AREP

Ywood Business building in Marseille (13) - 3,700 m<sup>2</sup>

Customer: Nexity

Architect: Carta Associés

# OFFICE BUILDINGS

**Performance at work and a company's economic success necessarily depend on the well-being of employees.** Timber takes care of their well-being and quality of life.

Several studies show that the absenteeism rate is reduced by around 30%.

MATHIS builds the professional living spaces of tomorrow, using innovative construction systems, creating comfortable buildings of high environmental quality in compliance with thermal, acoustic and safety rules.

Since timber buildings are well regarded by the population, elected officials encourage their construction.

Campus Arboretum in Nanterre (92) - 125,000 m<sup>2</sup> (ongoing project)

Customer: WO2

# RESIDENTIAL BUILDINGS

**Climate, environmental, urban and ecological challenges make timber construction the logical solution for the sustainable cities of tomorrow.**

MATHIS guides and advises project owners and project managers from the initial design stage, in order to facilitate projects and industrialize real estate programs as much as possible, thereby ensuring the best product.

Thanks to its high-performance construction systems and its state-of-the-art industrial machinery, MATHIS guarantees the quality of the finished product and orchestrates the process to reduce the time it takes to carry out your operations by 50% compared to conventional construction.

Large aircraft maintenance hangars at Basel-Mulhouse EuroAirport - 18,000 m<sup>2</sup>

Project manager: OTE Ingénierie

# INDUSTRIAL BUILDINGS

**So many advantages are offered by our timber construction solutions:** energy savings, rapid execution, warm working environment and increased company profile.

MATHIS timber construction systems provide high-performance solutions for industrial and logistics buildings combining solidity, fire safety, corrosion resistance, functionality and aesthetics. MATHIS prefabricates all the timber elements in its factory to guarantee you the best lead times.

Recycling center at La Veuve (51) - 31,800 m<sup>2</sup>

Architect: S'Pace, SEPOC

*Sulfur storage in the United Arab Emirates - 40,000 m<sup>2</sup>*  
Customer: ADNOC

Shopping complex in Sarrola Carcopino (2A) - 61,200 m<sup>2</sup>

Architect: Kase Architecture

# RETAIL SPACES

**MATHIS glulam and timber structures** are particularly suitable for building commercial spaces, hypermarkets and supermarkets due to their high fire resistance, the architectural possibilities they offer and the speed of construction.

Our expertise in mixed timber solutions also allows us to offer you economical timber/concrete or timber/metal solutions.

MATHIS works for the key players in retailing with a strong focus on deadline and price.

Marques Avenue A13 in Aubergenville (78) - 15,000 m<sup>2</sup>

Architect: C. Vergnaud Architecture & Associés

Intermarché in Saint-Bonnet-de-Mure (69) - 5,600 m<sup>2</sup>

Altermove in Marquette-Lez-Lille (59) - 2,300 m<sup>2</sup>

Architect: P. Coppe

Auchan in Saint-Jean-de-la-Ruelle (45) - 1,200 m<sup>2</sup>

Architect: B&A Architectes

*Soccer complex in Laval (Canada)*

Architect: J.C. Baudry

# SPORTS AND RECREATION

**MATHIS has forged a solid reputation in the field of sports and recreation** by offering timber construction systems that guarantee controlled construction and operating costs, as well as very short deadlines.

Gymnasiums, indoor tennis courts, dojos, swimming pools, water parks, velodromes, stadiums, a wide range of buildings... MATHIS sports and recreation buildings have benefited from the principles of the High Quality Environmental (HQE) approach for more than 20 years.

*Olympic Aquatic Center in Saint Denis (93) (project in progress)*

Architects: VenhoevenCS - Ateliers 2/3/4

Suchet stadium gymnasium in Paris (75)

Architect: KOZ

Watersports center in Mantes-la-Jolie (78)

Architect: Agence Search

Gymnasium in Drancy (93)

Architect: Atelier Dreyssé

Marineland in Antibes (06)

Architect: Cabinet Semmel-Biot

Community nursery in Saint-Pathus (77)

Architect: P. Ferret and S. Lucchini

Media library in Brumath (67)

Architect: Rey-Lucquet et associés

ENSIBS engineering school in Lorient (56)

Architect: Agence Nicolas Michelin & Associés

# EDUCATION

**MATHIS is a recognized constructor in the education and training sector**, building schools, colleges, universities, libraries and media centers.

Our expertise in timber construction allows us to offer you “All Timber” construction solutions in glulam, CLT, timber frame or timber ribbed panels, but also mixed timber/concrete or even timber/metal solutions.

We can also act as a timber general contractor, guaranteeing you control of construction and operating costs, in compliance with deadlines and current standards.

The Camp university campus in Aix en Provence (13)

Architect: Agence Vezzoni et Associés

ECAM engineering school in Schiltigheim (67)

Architect: ARX Architecture

Maison d'Education of the Legion of Honor in Saint Denis (93)  
Architect: Belus & Henocq

School in Plescop (56)

Architect: AIA Associés

# COMPONENTS AND SYSTEMS

**For more than 200 years, MATHIS has been innovating.** MATHIS is a leader in timber construction and glued laminated structures, offering new concepts to make all your projects a reality.

Economical, ecological, low energy consumption, quick to build, MATHIS products are at the forefront of innovation and design, to meet all requirements, from the simplest to the most sophisticated project.

MATHIS offers the best quality labels, equivalent to ISO 9002 in the timber industry, and guarantees the use of timber from sustainably-managed forests, as close as possible to our factory.

# Cutting-edge innovative products

## ÉCOLAM®

Eco-friendly glued laminated timber

## ACERLAM®

Universal glued laminated timber

## REDLAM®

Character glued laminated timber

## COLORLAM®

Feature glued laminated timber

## DALBOIS®

Solid panel in wall, roof and floor

## PROFILES AND MAXI SIZE

More than 20 types (from 41 x 127 mm to 840 x 2,046 mm)

## AZUREL

High performance timber frame

## AZURTEC - MNM®

Ribbed wall for great height

## AZURTEC - PNM®

Long span timber floor

# TRADITION & INNOVATION

**Through the generations**, by turns entrepreneurs, sawyers, carpenters and industrialists, MATHIS has been passing down its passion for timber and the tradition of fine workmanship since 1809. It considers people as its main asset, at the center of its development.

MATHIS has created an innovation culture: a large number of specialized engineers, often award-winning products and projects, real know-how in the dry construction sector and authentic expertise in mixed timber/metal construction.

As a leader in timber and glulam construction, MATHIS has based its reputation on its quality system, its respect for costs and deadlines - in a word, its seriousness.
